

dexos 1™ Gen 2 Full Synthetic Motor Oil

STARFIRE dexos 1™ Gen 2 Full Synthetic Motor Oils are state of the art, advanced technology motor oils formulated with sophisticated additives to prevent sludge formation commonly caused by moisture and combustion by products. An exceptionally high viscosity index minimizes cold weather oil thickening, preventing battery drain and engine wear, even at subzero startups. Exceeds GM dexos1™ Gen 2 specifications for world-wide requirements for all GM automotive gasoline engines currently in use.

APPLICATIONS

STARFIRE dexos 1™ Gen 2 Full Synthetic Motor Oils are for use in all Buick, Chevrolet, Cadillac and GMC vehicles starting in 2011 model year. They are also an excellent choice for previous model year vehicles produced by GM. They are recommended and suitable for use in all passenger cars, sports utility vehicles and light duty trucks operating on gasoline specifying API service category SN Plus, SN, SM, ILSAC GF-5, GF-4, Chrysler MS-6395, Ford M2C946-A and M2C929-A (5W-30). Supersedes GM 6094M and GM4718M.

BENEFITS

- Licensed and approved through General Motors
- Provides Low Speed Pre-Ignition (LSPI) protection for small displacement turbo charged and Gasoline Direct Injected (GDI) engines.
- Fuel economy improvements
- Meets manufacturers' latest warranty requirements
- Enhanced rust protection for Flex Fuel Vehicles, specifically those that run on ethanol-based fuel (E85)

TYPICAL PROPERTIES

Typical Test Data	0W20	5W30
Pour Point, °C	-45	-43
Viscosity: cSt @ 40°C	45.2	59.9
cSt @ 100°C	8.6	10.8
Viscosity Index	171	172.5
CCS, cSt	5671	3743.5
CCS, °C	-35	-30
Density (lb/gal)	7	7.1
Color	3	3.3
